Temperature

Humidity

Node-RED interface showing a flow named "testing_flow". The flow contains two nodes: "my_inject_node" and "Output_node". The "Output_node" is a debug node. The interface includes a left sidebar with node categories (common, function), a top bar with tabs for Flow 1, Flow 2, and Flow 3, and a right sidebar with configuration options. The browser address bar shows the URL: node-red-uzhqs-2022-10-08.au-syd.mybluemix.net/red/#flow/4a7855400c60c63e.

Node-RED interface showing the "Edit debug node" dialog box. The dialog box is open for the "Output_node" and displays the following properties:

- Output: msg.payload
- To: ☒ debug window, ☐ system console, ☐ node status (32 characters)
- Name: Output_node

The dialog box also includes a "Delete" button, "Cancel" and "Done" buttons, and a "Properties" tab. The background shows the "testing_flow" with the "my_inject_node" and "complete: 1" node.
